

creaholic

in one page

We are professional inventors.

**By agile management of the unknown,
we transform ideas into business.**

Our clients come to us because they need a better product, service or technology, and they value our ability to see problems in new ways and to come up with new solutions. At Creaholic we have:

More than 30 creative individuals
Over 30 years' experience
Completed more than 800 projects
Created over 180 patent families
Developed over 50 incubation ideas
Spun off 6 of our own companies

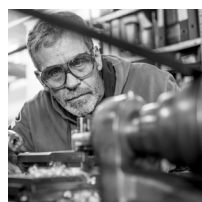

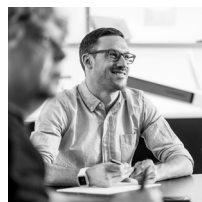

Our work has spanned industries as diverse as packaging, plastics, consumer goods, sporting equipment, medical devices, software, energy efficiency and much, much more ... and we're proud to have assembled a team with the skills and experience to support this enormous range of projects. Our know-how includes:

Technology and engineering
Business and management
Concept generation
Design development
IP creation

**Invention is usually a lonely activity,
but we've made it a team sport.**

**We'd love to talk about your business and see if there's
an opportunity for collaboration. Send us a message,
give us a call or, better yet, arrange to stop by the office.**
